CalEPA and its departments assist local, state and federal agencies during and after major wildfires. The services provided include emergency air monitoring by the California Air Resources Board, identification and removal of hazardous materials by the Department of Toxic Substances Control, and debris and ash removal by CalRecycle. The State Water Resources Control Board monitors water quality and ensures debris removal activities include measures to contain debris on site and prevent ash and other materials from entering rivers, creeks and streams.

For more on roles of CalEPA and its departments, see Reference Materials below.

Be Ready for Wildfire

Get ready now. Donâ??t wait until wildfire season or until danger

is near. Download the California Air Resources Boardâ??s California Smoke Spotter app to get wildfire alerts and smoke forecasts on your mobile phone. It includes personalized alerts for new fires, next day smoke forecasts, and [real-time Air Quality Index data from PurpleAir sensors](#). The app is available on the [App Store](#) and on [Google Play](#).

Make a custom wildfire preparedness action plan online, sign up to receive text messages on incidents near you and develop an evacuation action plan with [CalFIREâ??s Ready for Wildfire webpage](#).

[/et_pb_text][et_pb_text admin_label=â?•Text â?? Air Qualityâ?• _builder_version=â?•4.27.4â?³]

Air Quality

Wildfire smoke is a complex mixture of chemicals, gases, and fine particles. The biggest health threat from smoke comes from breathing fine particles. Listen to city and county officials and heed their warnings and instructions. If you see or smell smoke, protect yourself and your family by staying indoors and avoiding outdoor activities. Seek medical assistance if you have difficulty breathing or experience chest discomfort, wheezing, or shortness of breath. Even healthy people may experience some of these symptoms in smoky conditions.

Debrisâ³ _builder_version=â³4.27.4â³]

Debris from burned buildings can

contain toxic substances. Homeowners may have gasoline, cleaning products, pesticides, and other chemicals stored in garages and sheds that may have burned in the fire. It is important not to expose yourself or your family to any of these materials.

Photo: TC Clark, CalRecycle

Debris awaits cleanup after fire destroyed a Lake County apartment complex in 2015.

Residents

Government-led Cleanup for Burned Properties

The Department of Toxic Substances Control (DTSC) removes hazardous materials from private properties damaged by wildfire, when mission tasked to do so by Cal OES, and in coordination with local government agencies. Daily updates on their missions and progress are posted online at [DTSC: Wildfire Household Hazardous Waste Removal](#). Once DTSC's work on hazardous materials is completed, CalRecycle can begin the process of removing ash and debris. For more information on CalRecycle's activities and on how to register eligible burned properties for cleanup, visit [CalRecycle: Wildfire Debris Cleanup and Recovery](#).

Leave Ash and Debris Alone at Burned Properties

Cleaning debris and ash from a structure fire is dangerous. Burned buildings may still have walls that could collapse, batteries that could explode, and chemicals that are hazardous to your health. State, local and federal officials initiate assessment and cleanup operations when it is safe to do so, under the coordination of the Governor's Office of Emergency Services. If you are a resident of a burned area, we strongly encourage you to look to your city or county government for guidance, instruction and updates. Information is also available at [wildfirerecovery.org](#).

Photo: TC Clark, CalRecycle
Contract crews clean debris following a fire in 2014.

No Fire Damage? How to Clean Light Ash

If your property was not burned, but has light ash from nearby wildfires, you may still want to hire a contractor as wildfire ash can be dangerous. If, however, you choose to clean your own property, you can increase your safety by following the guidelines in the fact sheets below:

Fact Sheet: Protecting Public Health from Home and Building Fire Ash (Safe Cleanup of Fire Ash) ([English](#), PDF) | ([Español](#), PDF)

Wildfire Smoke Factsheet: [Protect Yourself From Ash](#) (PDF)

Asbestos Removal

It is important to help minimize the release of asbestos into the environment following a fire. A number of local, state, and federal regulations, including National Emission Standards for Hazardous Air Pollutants (NESHAP), provide safe handling and proper disposal instructions for fire ash and debris containing asbestos. For specific NESHAPs requirements or other local air quality regulations, please contact your air district or the California Air Resources Board (CARB).

Water Protection

Local officials may issue a Boil Water Order when drinking water is contaminated or if a fire has damaged waste water and sewage treatment systems. If such an order is issued, residents should not use their tap water for drinking, washing dishes, washing hands or bathing, for cooking, or brushing teeth without first boiling the water. More information is available at the State Water Resources Control Board's [Drinking Water Programs](#) webpage.

Animals
