April 22, 2019

The Honorable Ben Allen
Chair, Senate Environmental Quality Committee
State Capitol, Room 2205
Sacramento, CA 95814

Dear Senator Allen:

Thank you for your letter of March 1, 2019. We continue to appreciate the shared efforts of the Legislature and the Administration in developing and implementing programs – including the Cap-and-Trade Program – to achieve California’s greenhouse gas (GHG) emission reduction targets and ambitious climate goals.

Your letter raises the important topic of allowance supply in the Cap-and-Trade Program. We take this issue seriously.

GHG emissions in California have declined faster than anticipated. This decline will yield unused allowances at the end of 2020. Using best available data, we compared an estimate of unused allowances with a forecasted demand for allowances post-2020 when the annual caps decline about four percent each year, double the current rate. Our analyses, and those of several independent market analysts, forecast continued and steady increases in allowance prices over time, sending the critical price signal for companies to act to reduce their GHG emissions.1 As a result of these analyses, California Air Resources Board (CARB) determined that no changes to

allowance supply or banking rules are required at this time. Though forecasted demand may be uncertain, removing allowance supply today will certainly increase compliance costs and costs to consumers, negatively impacting affordability for Californians.

We agree with you that we must continue to monitor our programs and make program adjustments as needed to ensure the program continues to deliver GHG reductions in a cost-effective manner. CARB held two public workshops and released two public documents regarding the issue of over allocation.

CARB will hold a public workshop this summer to discuss potential methodologies to evaluate cost-effective reductions. We have invited the chairman of the Independent Emissions Market Advisory Committee (IEMAC), Dallas Burtraw, to participate in that workshop.

Per your request, we provided data related to current allowance supply. See Appendix A attached. As a jointly operated, Western Climate Initiative (WCI)-wide market, California and Québec publishes data included in Appendix A to enable market participants and the public to understand the program. We will continue to engage with the Legislature, Québec, the IEMAC, and other market experts on recommendations related to additional data disclosures.

In taking action to reduce GHG emissions, we are acutely aware of the need to simultaneously address issues of affordability while avoiding over allocations of allowances. Analysis shows that California’s portfolio approach to addressing climate change produces the highest likelihood of meeting California’s GHG targets. The portfolio approach is also four times less costly than alternatives without Cap-and-Trade, and results in minimal impacts to the economy, jobs, and household income. In short, we are seeking to implement the most effective and affordable approach to reducing California’s GHG emissions.

Thank you again for your continued leadership and interest in the success of our programs. We appreciate David Garda's participation in the first IEMAC meeting of 2019 and look forward to legislative engagement with the IEMAC. Should you have further questions, please contact Virgil Welch, Special Counsel to the Chair, CARB, or CalEPA's Deputy Secretary for Legislation, Anna Ferrera.

Sincerely,

Mary D. Nichols
Chair- California Air Resources Board

Jared Blumenfeld
Secretary for Environmental Protection

**Note:** CARB cannot publish the jurisdiction of origin of allowances (outside of non-vintage Quebec Early Action allowances) for legal jurisdictional reasons. The jurisdiction of origin is not necessary to assess the current supply of compliance instruments or to understand the number of vintage 2017 and earlier vintage allowances banked at the end of the second compliance period. This table provides all instruments in private entity accounts as of January 4, 2019.
