2022 Climate Change Scoping Plan Update

SEPTEMBER 28, 2021

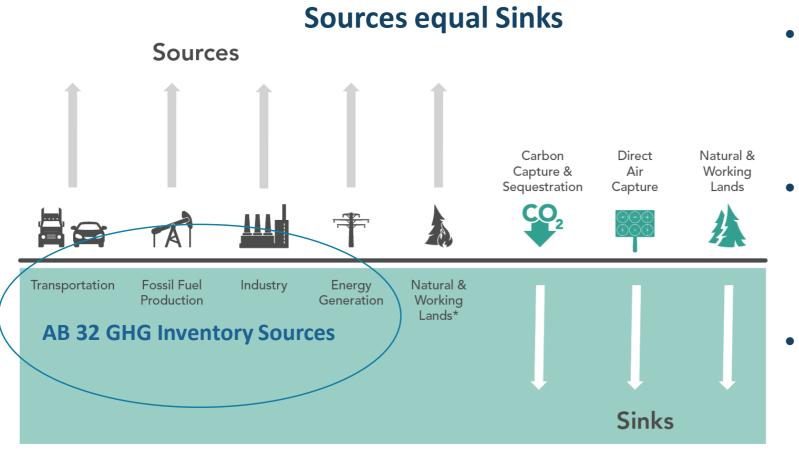

CALIFORNIA AIR RESOURCES BOARD

CA GHG Reduction Targets

- Achieved AB 32 target 4 years early in 2016
- 2030 target is milestone on way to carbon neutrality
- 2022 Scoping Plan will assess progress toward 2030 target and lay out path to carbon neutrality by 2045

Science-based Target: Achieve Carbon Neutrality (CO₂e) Mid-Century

- Continue to reduce emissions from sources in AB 32 GHG Inventory
 - Reduce emissions and increase sequestration in Natural and Working Lands
- Maximize all sinks with goal of achieving net negative

^{*}Natural and working land emissions come from wildfires, disease, land and ag management practices, and others

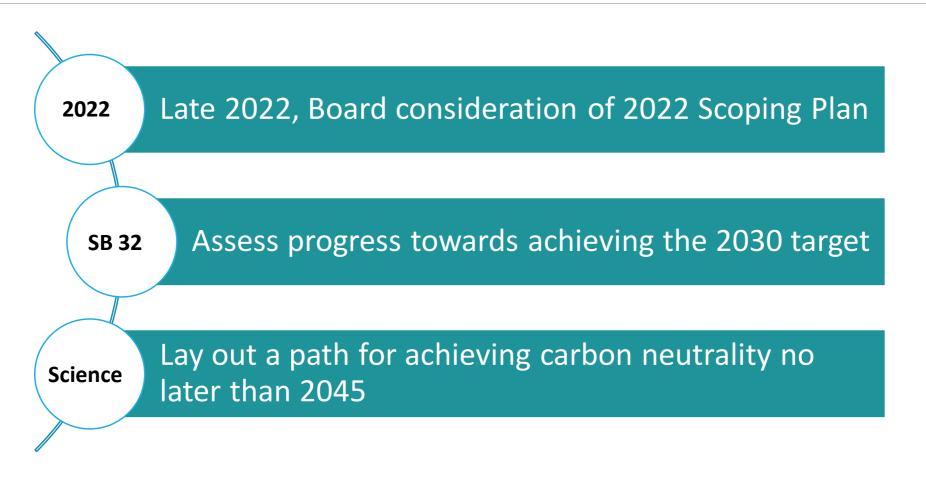

AB 32 Scoping Plan Implementation

Governors, Legislature, Californians want action to address climate change

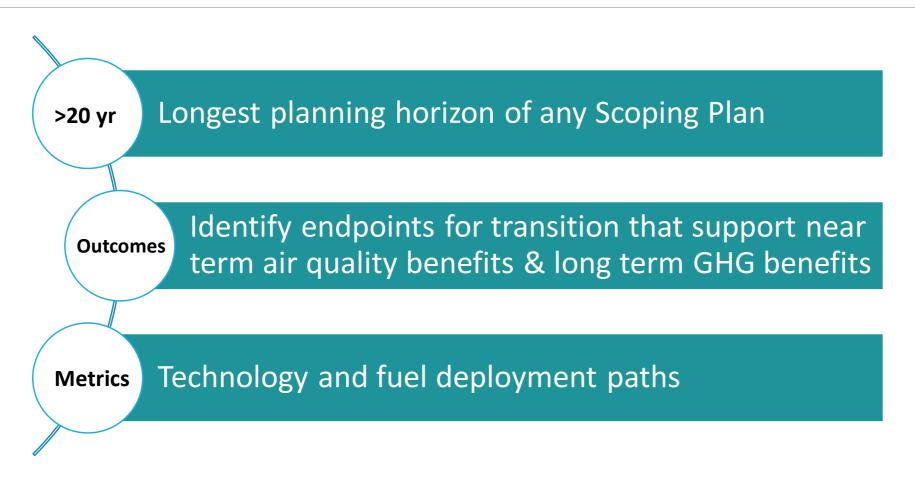

Steady state-level policy signals are attracting private investment in clean technology

Delays and opposition at local level for permits

2022 Scoping Plan Update: Key Objectives

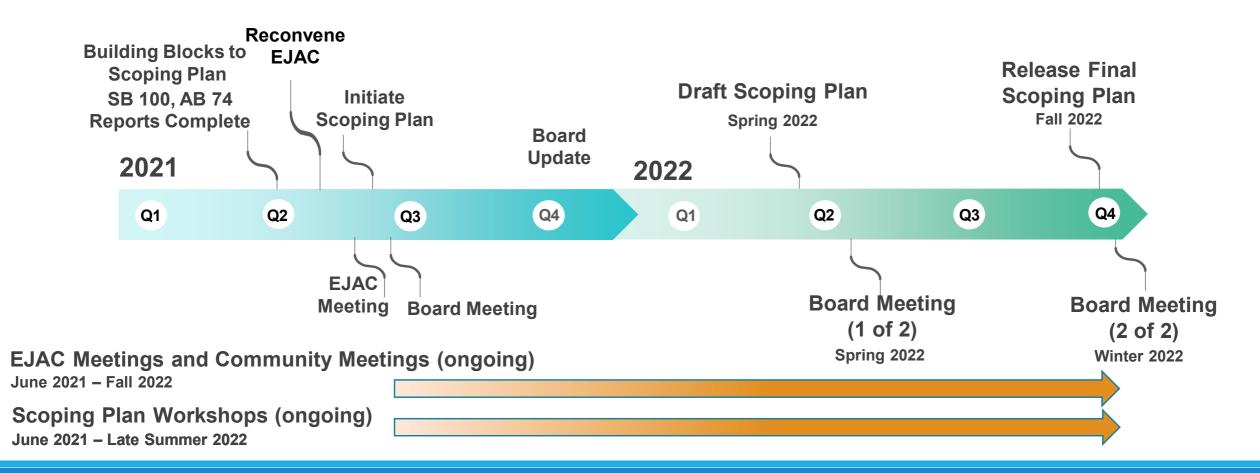

2022 Scoping Plan Update: Key Objectives, cont.

Final Scoping Plan

- Actionable statewide blueprint to align efforts to achieve the state's climate goals
- 2017 Scoping Plan is underpinned by statutes and dozens of individual regulations and actions across state agencies
- Considered and adopted by the CARB Board
- Annual implementation updates to the CARB Board
- Does not go into details in individual program or regulation design
- Does not supplant or create new statutes or regulations
